拥有广泛创意设计的基础窗系统

旭格AWS 65铝合金窗系统

种类广泛，是适用于不同窗户应用的标准系统。多达5种的设计轮廓既能突出新建筑的迷人外观，又可成为翻新项目的理想选择。系统型材种类广泛，具有纤细的可视面宽度和极高的透明度，加上与旭格ADS门系统互相兼容，可实现高端精致的设计。

旭格隐扇系统将窗扇隐藏起来，打造极为典雅的窗户外观。极为纤细的外框带来充满魅力的设计选择，让外框整个覆盖在扇框上，留出大面积透明的玻璃区域。卓越的隔音性能及防盗等级达到RC3 (WK3) 的安全性能使得旭格窗系统不仅可以信赖，还成为一个多面手。就便捷而言，隐藏式五金件旭格AvanTec和机电驱动的旭格TipTronic如人所愿地提供实时便利的操作。此外，还有一系列设计精致的执手，为每个轮廓系列划上完美句点。

The basic series with a comprehensive range for imaginative designs

The Schüco AWS 65 aluminium window system is an ideal standard system for a variety of window applications due to its broad range. Up to five design lines are available for creating attractive visual accents in both newbuild and modernisation projects. A wide range of profiles for narrow face widths and a high degree of transparency, as well as complete compatibility with the Schüco ADS door range allow sophisticated designs to be implemented effectively.

Schüco block systems create a particularly elegant window design without visible window vents. This attractive design option, where the outer frame completely covers the vent frame of the window, creates large transparent glazed areas due to its extremely narrow frame. With excellent sound insulation values and burglar resistance to RC3 (WK3), the Schüco window is both a reliable and versatile partner. In terms of convenience, the concealed Schüco AvanTec fittings and the Schüco TipTronic mechatronic drive can provide contemporary ease of operation on request. In addition, there is a wide range of elegant handles to give the perfect finish to every design line.
